- |              |              |
|--------------|--------------|
| • HTML       | • Node.js    |
| • CSS        | • Express.js |
| • Javascript | • MongoDB    |
| • React.js   | • Bootstrap  |

## Experience

### Institute UI

Institute project

Dec -2024

In this web page, I created a website for my institute with react, css, js and other libraries like swiper. I also do it's routing with react & add animation to make this website more interactive & dynamic. This is institute project given by my teachers to build & enhance my skills.

### Task Management App

Personal Project

Nov -2024

Management App to organize your daily tasks. Add tasks with a title, description, due date, and priority. Edit, delete, or mark them as complete, and filter tasks by status. With a clean, responsive design, it's perfect for staying productive on any device.

### Weather App

Personal Project

Jan - 2025

A responsive weather application built using React and OpenWeatherMap API. It allows users to search for real-time weather updates for any city, including current temperature, minimum and maximum temperatures, and location details. The app features a clean and modern design with smooth animations and responsive styling optimized for devices.
